MANAR HAMDAN

CYBER SECURITY

Amman, Jordan | +962-780-398-696 | manarhamdan222@gmail.com | linkedin.com/in/manar-hamdan-565b5b346

SUMMARY

Cyber Security graduate from Tafila Technical University ("Very Good" standing) with hands-on experience in penetration testing, digital forensics, network security, and IoT protocol analysis. Completed an internship at the Ministry of Digital Economy and Entrepreneurship focused on ISO 27001. Built a graduation project implementing a blockchain-based pharmaceutical supply chain tracking system.

EXPERIENCE

Information Security Intern — Ministry of Digital Economy and Entrepreneurship, Jordan *3 Months*

- Studied and applied concepts of ISO 27001 (Information Security Management System).
- Gained exposure to information security policies, risk assessment, and compliance frameworks.

PROJECTS

PharmaChain – Pharmaceutical Supply Chain Tracking System

- Graduation project. Built using ASP.NET Core (C#), SQL Server, and HTML/CSS/JS.
- Implemented a tamper-evident blockchain ledger using SHA-256 hash chaining.
- Developed QR code generation and verification for drug authentication.
- Built a block explorer page and a live tamper demonstration.
- Supervised by Prof. Ashraf Al-Khresheh — Team of 4.

Digital Forensic Investigation – Recovering Deleted Evidence from USB Storage

- Acquired a bit-by-bit forensic image using FTK Imager and verified integrity with MD5/SHA1 hashing.
- Recovered deleted temporary file artifacts using Autopsy. Course: Digital Forensics.

Linux Web Server Deployment and Penetration Testing

- Deployed the Simple PHP Blog on Ubuntu using the LAMP stack.
- Configured UFW firewall, SSH hardening, and server identity suppression.
- Performed penetration testing using Nmap, Nikto, and Dirb; identified exposed .git directory and directory indexing. Course: Infrastructure Security Using Linux.

Performance Comparison of MQTT and HTTP for IoT Applications

- Set up Ubuntu Server on VirtualBox; implemented MQTT (Mosquitto broker) and HTTP (Flask) clients using Python.
- Measured latency, throughput, scalability, and reliability under simulated packet loss.
- Published as a research paper. Courses: Scientific Research Methods in ICT & Wireless and Mobile Networks.

MapReduce Word Count Using Hadoop

- Implemented a distributed Word Count MapReduce job using Hadoop Streaming API and Python, executed on Google Colab.
- Visualized word frequency results using matplotlib. Course: Cloud Computing.

Spyware Analysis and Threat Research

- Analyzed spyware behavior, attack vectors, and detection and mitigation techniques.

SKILLS

Digital Forensics: FTK Imager, Autopsy, Hash Verification (MD5/SHA1), Evidence Acquisition
Network Security: Firewalls (UFW), SSH Hardening, Packet Analysis, IoT Protocols (MQTT, HTTP)
Programming: Python , HTML/CSS/JS, Git & GitHub
Standards & Compliance: ISO 27001 (Information Security Management System)
